Made in **Poland**

Lena Lighting S.A. is a leading Polish manufacturer of high quality lighting fixtures. Since 2005 listed on the main market of the Warsaw Stock Exchange in Warsaw, Poland. We design, develop and manufacture professional lighting solutions.

34+

Years of experience

01 / 04 — **Passion and professionalism**

Our company was born out of fascination with light. For 34 years of running our business, we have gained knowledge and competences, thanks to which we can design and manufacture even the most complex lighting systems

02 / 04 — **Inspiration and design**

We make sure that our products are distinguished not only by the best parameters, but also by unique design. We believe that the space that surrounds us has a real impact on our well-being. We create our products having the above in mind.

03 / 04 — **Innovation and development**

We offer technologically advanced solutions. We constantly invest in the development of our research centre and state-of-the-art production lines. We develop dynamically with the advancement of technology.

04 / 04 — **Sustainable development**

We have placed environmental management at the heart of our business, implementing a system that minimises any negative impact on the natural environment. We are ISO 14001 certified.

Colline x Terrano

DESIGN: Aleksandra Mętlewicz & Mateusz Gaczkowski & Lena Lighting

reddot winner 2023

Harmony of the senses

Colline x Terrano ensure comfort and a sense of well-being every day. It is light that makes it possible to explore the world in all its richness and to spend time in a space conducive to celebration or work. Silence, on the other hand, soothes the senses and allows one to indulge in deep relaxation, providing balance.

„We are of the opinion that silence allows one to experience the new. But it is only light that brings out the best in it. It makes silence tangible. Visible. More resonant. Multi-dimensional. Silence and light together create a perfect synergy“.

Messaggio

DESIGN: Dorota Koziara

The Messaggio collection, designed by Dorota Koziara, includes pendant lamps with a minimalist form. They can come in all RAL colors, including a multicolor version, where the outside of the housing and the inside of the lamp have different colors. Thus, Messaggio provides unlimited arrangement possibilities.

With the ability to adjust the length of the Messaggio lamps' pendants, surprising light compositions can be created. Versions with DALI control allow you to change the value of the light output, which further enhances the decorative effect.

„I consider light the most magical phenomenon. It brings out shapes, builds the atmosphere and allows us to explore the world we live in. The Lena Lighting brand invited me to cooperate and I am very happy that together we will create products that will help you illuminate your everyday life.“

Baris Square LED

DESIGN: Michał Jaraczewski

Baris Square LED is a striking pendant lamp. Its classic shape fits perfectly into modern design. The lamp body is made of anodized aluminum profile in gray or aluminum profile painted in white or black (other colors available on request). The lamp is offered with two types of lampshade - prismatic or milky. The availability of the lamp in four sizes allows you to design the distribution of lighting in an individually tailored way. Lamps of different sizes and hung at different lengths can create an unlimited number of lighting compositions in the room.

Baris LED

DESIGN: Michał Jaraczewski

Suspended or surface-mounted luminaire with classic proportions and modern design. The design of the luminaire allows you to create lines up to 6 meters long with no need to join the profile and up to 25 meters without diffuser joints. Straight connectors and luminous L, T, X, V-shaped bends allow you to create virtually unlimited sequences of straight lines, figures and patterns. The body of the luminaire consists of an anodised aluminium profile in grey or an aluminium profile painted in white or black (other colours available on request).

Design

Baris is a modern luminaire. Its rectangular form is classic and it fits into any interior.

I was looking for innovation. I wanted Designers to reach for this luminaire eagerly and return to it in subsequent investments. A lot is happening here. You can order a five-meter luminaire made of one piece of aluminium, or adjust its length every 14 cm. Mount it on the surface, suspend it or hide it in the ceiling.

Choose any colour of light and decide for different optics. And with this luminaire, this is just the beginning. Baris is a modular system which, like an app, will change thanks to its customers.

Michał Jaraczewski / Designer

Less is more

The Baris family consists of luminaires of classic proportions and modern design. These are multi-purpose luminaires characterised by high aesthetics and excellent lighting parameters. Their orderly design will fit perfectly into any minimalistic space.

Expo Adjust

DESIGN: Jakub Zarzyński

Expo Adjust are top quality aluminum projectors with LED COB light source. The projectors are available in versions that allow mounting on rails, as well as surface and flush mounting, such as in plasterboard ceilings. Mounting on a trunking system, increases the range of applications and allows the user to make arrangement changes even after installation. The compact, small-sized aluminum body with a heat sink effectively dissipates excess heat from the projector and increases the life of the product. The aesthetically pleasing ABS box effectively masks the power supply housed in it.

Loft

Expo Adjust is a complementary element for representative and boldly designed architectural interiors. This is why the smooth body of the luminaire is finished with a masking grid, reminiscent of the grid solutions popular in the fancy loft projects.

Solanto

DESIGN: Michał Jaraczewski

Suspended or surface-mounted ring-shaped LED luminaire, allowing for an attractive arrangement of representative interiors. The luminaire is made of steel powder-coated in white, black, or other colors to fit the character of the interior. The milky diffuser made with thermoforming method emphasises the decorative character of the luminaire. The pendant option includes a complete pendant system with a central box.

Multi LED versions to allow you to choose from 4 flux and power settings increasing the versatility and functionality of the luminaire while reducing the number of indexes to the necessary minimum.

Solanto is a family of luminaires made with high aesthetics and the highest quality of workmanship. Two available dimensions of circles, various colours and the possibility of adjusting the suspension length give the architect a wide range of arrangement options. Luminaires are dedicated to representative rooms as well as private apartments.

Tiara LED

DESIGN: Our R&D team

TIARA 2 LED is a new generation of LED road luminaires. It draws on the proven form and best solutions, which, in an improved form, it takes to a new, even higher level, giving a wide dimension of possibilities and functionality.

Through the use of dedicated optics, it is possible to illuminate objects such as: highways, expressways, national, provincial, county, municipal, city and neighborhood roads, area lighting, pedestrian crossings. In addition, optics are available to illuminate sidewalks, bike paths, side streets.

Good design

Our energy-saving Tiara LED road luminaire won in the Green Design 2021 category in the most prestigious Polish design competition – Good Design. The Green Design 2021 award confirms that highly energy-saving technological solutions can be skilfully combined with distinctive design, also in the road lighting category.

Academy

We illuminated Greater **Poland Children's Health Center** in Poznan

We illuminated one of the most modern pediatric hospitals with over 7,500 led luminaries. Both inside and outside the building were installed energy-efficient lighting equipped with new generation LED modules. In total, more than 7.5 thousand led fixtures, including specialized LABO luminaries for sterile hospital rooms, as well as our flagship products. In the hospital, you will also find many striking designs: Terra, Piatto, or Arto luminaries.

Modern **design**

Zakqtek Malucha nursery

The English-speaking nursery in Łochowo is a perfect example of a modern children-friendly space. The interiors of "Zakqtek Malucha" delight with unique lighting arrangements created with the use of our products. Energy-saving luminaires, used throughout the building have been arranged in an extremely spectacular way.

Poznań University
of Technology

More than energy efficient

We have designed a modern lighting system in Poznań University of Technology. It consisted of two installations that do not exceed the **total power consumption of 1kW**.

Can You imagine, that's a half the power consumption of your electric kettle?

We create **the light together**
